

HOW TO USE THE WHIRL-PAK® BAG

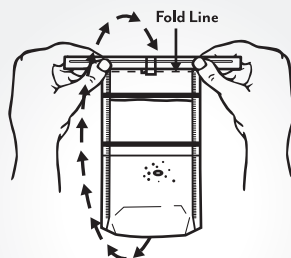

1. Label the bag with sample information.

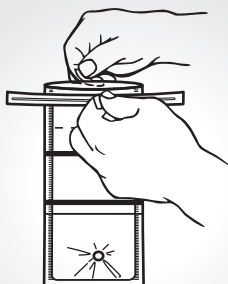

4. Put water sample into the bag.
Fill to the printed fill line on the bag.

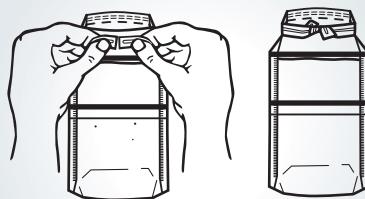

2. Tear off the top of the bag along the perforation.

5. Holding the bag by the wire ends,
whirl the bag to the Fold Line. If there
is not a fold line, whirl the bag three
complete revolutions.

3. Use the pull tabs on each side to open
the bag.

6. Bring the two wire ends together and
twist tie them together.
